SUMMARY

Software engineering professional with six years of experience developing robust, business-oriented digital solutions. I have participated in key projects including microservices-based architectures, process automation, and scaling integrations on high-traffic platforms. I am proficient in modern technologies and have experience in cloud environments (AWS, Azure, GCP), along with a results-oriented approach focused on quality and continuous improvement.

EXPERIENCE

CLOUD ENGINEER

november 2024 - december 2025

Celerik

I design and implement solutions using language models to automate processes, improve user experience, and enable functionalities such as chatbots and text analytics, applying scalable architecture and best practices in the cloud. I participated in the development of an educational financial assistant based on LLMs, creating the backend with FastAPI and Clean Architecture, authentication with OAuth2, and the complete frontend in React.

Python · Fastapi · Pytest · TypeScript · React.js · Jest · Tailwind · Open IA · OAuth2 · PostgreSQL · Cosmos DB · Microservicios · Azure Cloud Services

CLOUD ENGINEER

may 2024 - february 2025

Conexalab

I developed a platform for real-time data visualization and interactive maps, contributing to the architectural design (based on the octagonal pattern), full-stack development, performance optimization, and security. The technical decisions made significantly reduced development and response times. The solution is in production and continues to be actively evolved.

Node.js · TypeScript · Python · React.js · Next.js · Jest · Tailwind · Maptiler · Google Earth Engine · Modal Lab · MQTT · PostgreSQL · Mongo DB · Microservicios · Vercel

CLOUD ENGINEER

january 2023 - january 2024

Melonn

I participated in the full-stack development of integrations with e-commerce platforms such as Mercado Libre, Liverpool, Shopify, and WooCommerce, working on data synchronization and connecting to external APIs. I also contributed to the implementation of a multi-regional Disaster Recovery Plan (DRP) on AWS, ensuring service continuity in the event of regional outages.

Node.js · TypeScript · Jest · Python · GraphQL · React.js · Microfrontend · Playwright · Microservicios · Amazon Web Services (AWS)

FULLSTACK DEVELOPER

march 2022 – october 2022

Mayasoft

I actively contributed to the development of a platform to optimize pilot schedules, reducing delivery times by 30% and assuming full responsibility for the product. I also integrated an RPA solution to automate legal contracts, decreasing human error by 40%, accelerating processing, and reducing operating costs.

NestJS · Node.js · TypeScript · Python · React.js · MongoDB · PostgreSQL · Google Cloud

FRONTEND DEVELOPER

january 2021 – november 2022

Binary Groups

I contributed to the development of a web application that integrated multiple e-commerce platforms under a single user account, centralizing information and streamlining sales management across various channels. The platform consistently met the agreed-upon delivery times.

Next.js · React Native · Node.js · TypeScript · React.js · Google Cloud · Amazon Web Services (AWS)

FULLSTACK DEVELOPER

november 2021 – march 2022

Woombat Consulting Group S.A.S

I participated in the development of a biometric authentication web SDK for financial platforms, significantly improving the integration experience in web environments. It was implemented using native technologies to ensure compatibility with any frontend framework, facilitating its adoption and reducing technical complexity.

TypeScript · Babel.js · Node.js · Webpack · Cypress.io · Amazon Web Services (AWS)

FRONTEND DEVELOPER

february 2021 – july 2022

Bitnovo

I was in charge of developing the frontend of the Bitnovo website, a company specializing in cryptocurrency trading.

TypeScript · Babel.js · Node.js · Webpack · Cypress.io · Amazon Web Services (AWS)

SKILLS

Amazon Web Services (AWS) · Azure Cloud Services · React.js · Node.js · JavaScript · Python · Fastapi · Google Cloud · Playwright · Linux · Windows · MongoDB · GraphQL · Optimización · Cypress.io · Swagger · Figma · Redux.js · SWR · RxJS · Webpack · Babel.js · Angular Material · Azure DevOps Server · NestJS · styled-components · Jenkins · Docker · TypeScript · Material-UI · Nativebase · GitLab · GitHub · Computación en la nube · Git · Microfrontend · Python · Django · Django REST framework · PHP · Laravel · CSS · HTML5 · SQL · React Native · AngularJS · Next.js

EDUCATION

SYSTEMS ENGINEER

2015 – 2022

Universidad Industrial de Santander (UIS)
